About Me

My experience encompasses a wide spectrum, ranging from HETV/SVOD drama, comedy, documentary to commercial productions. I collaborate across departments, establishing data and color workflows while closely working with the DoP and HoDs. My cross-departmental experience of camera, sound, and post-production instills producers with confidence, assuring them that their media is meticulously handled and secure.

I have a proven track record of establishing efficient workflows tailored for global streamers and broadcasters. My role involves providing technical guidance and support to camera, sound, production and post-production departments. I manage extensive volumes of data from multiple cameras, contribute to creating show looks with the DoP, and ensure rigorous quality control.

With close to a decade of experience as a multi-format camera operator for prestigious institutions like Bloomberg and The United Nations, I offer unique, extensive technical expertise as the DIT for scripted HETV productions.

Additional Information:

- Proficient in industry standard DIT practices including media and image pipeline management, transcoding, on set colour correction, matching and grading for dailies (Silverstack Lab, DaVinci Resolve).
- Reliable and confident knowledge grounding in formats, compression, codecs, colour processing and workflow across camera, sound and post-production systems. This includes Netflix Production QC and error code reporting.
- Strong and friendly communication skills for working directly with the DoP, camera department, HoD's, production office and post-production.

References and kit list (including DIT van and 3.6KW solar/electric generator) available upon request.
